

HE 236

Mains Supply

General Description

Simple power supply for all control and power amplifiers in a 19" modular chassis assembly. European card with main switch and fuse on the front panel and ring core transformer with very low magnetic field leakage.

Technical Overview

- **Supply** : 230v or 115v AC
- **Output voltage** : 18v AC - 0v - 18v AC
- **Output power** : 50 VA (sufficient for 2-3 servovalves). Also available in 80VA, 100VA and 120VA and in voltages of 15v AC, 20v AC and 24v AC
- **Dimensions** : 100 x 160 mm, 10 TE
