

PWM

Chopper amplifier

General Description

For interface between PC or CNC controllers with voltage output and servovalves with torque motors. Connected by screw connections directly onto the servovalve assembly.

Technical Overview

- **Supply** : +24v DC (18v...28v)
- **Output current** : 0...±200 - 1000 mA (adjustable)
- **Input options** : 0...±10v
: 0/4...20 mA
: 0...±20 mA
- **Dimensions** : In accordance with valve width and height
- **Protection rating** : IP67 mounted on the valve
